WATER AND SEWERAGE AUTHORITY  
OF TRINIDAD AND TOBAGO

## WASA Advises Customers of Cutback in Production at Point Fortin Desal Plant

The Water and Sewerage Authority (WASA) has been advised by Seven Seas Water (SSW), owner/operator of the Point Fortin Desalination Plant that, operations at the facility was cutback at 7:30 a.m. today – Thursday 13<sup>th</sup> February 2025, due to high levels of algae bloom, in the intake area of the plant. At present, water delivery from SSW to the Authority has been reduced to 4.38 million gallons per day, down from the usual 5.5 million gallons per day.

As a result of the reduced output, customers in the following areas may experience disruptions or low water pressure:

**Point Fortin proper, parts of Techier, Vance River, Parrylands, Cochrane, Mahaica, Lot 10, Cochrane, Savannah, Harriman Park, Clifton Hill, Reservoir Hill, Merrimac, Vessigny, TGU, La Brea (up to the Pitch Lake).**

SSW has assured the Authority that every effort is being made to return the facility to full production at the earliest. The Authority will continue to liaise closely with the company and inform customers subsequently, when operations have normalized at the Plant.

For further information, assistance, or to request a truck-borne delivery, customers can also contact WASA's Customer Call Centre toll-free at \*800-4420/26\*.

WASA apologizes for any inconvenience caused and thanks customers for their patience and understanding
