WASA CONDEMNS ACTS OF VANDALISM AND THEFT IN GASPARILLO – Public urged to remain vigilant for acts that can compromise service delivery.

The Water and Sewerage Authority (WASA) strongly condemns the recent acts of vandalism and theft targeting its infrastructure in the Gasparillo area, which have severely disrupted water supply to several residents.

Between March 31 and April 1, 2025, over thirty-four (34) residential connections in San Fabian, Rawlings Avenue, Recreation Ground, PRV Goodman Trace, Bhagwansingh Trace, and Springland’s Third and Fourth Streets were vandalized, with brass fittings and service lines stolen. These criminal acts have left affected customers without a reliable water supply, forcing WASA to prioritize emergency repairs while supporting police investigations.

During inspections, WASA personnel discovered a pipe-cutting device on Bhagwansingh Road, which has been handed over to the Gasparillo Police and the Forensic Department for analysis. The Authority is working closely with the Trinidad and Tobago Police Service (TTPS) to ensure those responsible face the full brunt of the law.

These reckless acts not only inconvenience customers but also divert critical resources from servicing legitimate needs. We urge the public to report any suspicious activity near WASA infrastructure to the police or our Customer Contact Centre at 800-4420/4426.

The Authority reassures customers that repairs are underway and thanks the community for their patience. WASA remains committed to safeguarding its assets and ensuring equitable service.
